PRODUCT FEATURES

REMOTE VERIFICATION

Verify your personnel and clients remotely prior to face-to-face contact. Use Otem as part of your COVID secure strategy.

RIGHT TO WORK CHECK

Enhance your due diligence when checking for right to work status and eliminate the liabilities of illegal working.

BIOMETRIC VERIFICATION

Otem uses facial recognition technology and liveness detection to secure against identity theft.

SECTOR SPECIFIC

Otem can meet identity verification standards across multiple sectors including education, healthcare, legal and the finance sector.

DOCUMENT VERIFICATION

Validate passports, government issued ID cards, driving licences, Biometric Residence Permits (BRPs), visas and over 4,000 other document types from over 100 countries in real-time.

GDPR COMPLIANT

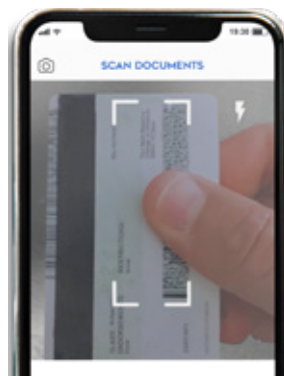

Our solution is GDPR compliant by design. We have embedded the GDPR framework in every aspect of our solution giving you complete confidence and assurance.

HOW IT WORKS

Secure Access

Send a secure link to the individual you want to verify

Fully Automated Checks

User then accesses Otem via the secure link to complete the verification process

Real-time Updates

Receive instant notification of the results directly to your business upon completion of the identity checks
